

**Doctor Steven Kemp**  
**(BSc (Hons). D Clin Psychol. PG Diploma. AFBPsS)**  
**Consultant Clinical Neuropsychologist**

The  
British  
Psychological  
Society

Chartered Psychologist

**Qualifications and experience:**

I am Dr Steven Kemp, I hold the degree of Bachelor of Science (Psychology – First Class) awarded from the University of Hull and the degree of Doctor of Clinical Psychology awarded from the University of Leeds. I am registered with the British Psychological Society (BPS) as a Chartered Clinical Psychologist (C. Psychol). I have completed a Post Doctoral Diploma in Clinical Neuropsychology at the Maudsley Hospital, King's College, University of London. I hold practitioner fullmembership of the Division of Neuropsychology of the British Psychological Society. I am an Honorary Lecturer at the University of Leeds, Faculty of Medicine and Health. I am registered with the Health and Care Professions Council (HCPC). I am an Associate Fellow of the British Psychological Society.

I am currently in clinical practice as a Consultant Clinical Neuropsychologist at St. James' University Hospital, Leeds. I specialize in the assessment and treatment of brain injured patients. This involves understanding the neurocognitive, psychological and social impact of brain injury and neurological disease. I routinely see brain injured patients for neuropsychological assessments in order to determine the effects of injury on cognitive functioning (i.e. memory and concentration), personality and behaviour and provide treatment and rehabilitation. I also see patients to assess and treat the psychological affects of injury or illness. For example, post traumatic stress disorder (PTSD), anxiety, depression or psychological symptoms that can result from traumatic experiences or neurological illness.

I have a special clinical and research interest in; traumatic brain injury, memory disorders, effort or symptom validation testing, the neuropsychology of epilepsy, neuropsychological rehabilitation, dementia and the aetiology and psychological treatment of medically unexplained symptoms (MUS) / functional neurological disorder (FND).

I have over twenty years' experience in the field of Clinical Neuropsychology and I am the author of several recent publications. I am cited in the British Psychological Society (BPS) Directory of Chartered Clinical Psychologists and the BPS Directory of Expert Witnesses. I am listed on the BPS Specialist Register in Clinical Neuropsychology. I am a member of the Expert Witness Institute (EWI).
